Mimer SoftLine

- Have you got a problem with too expensive leased lines?
- Do you need to transfer both audio and data?

Mimer SoftLine is a system that replaces leased lines with LAN or Internet connections.

A network interface is installed at each end and connected to LAN and/or the Internet. Between the two interfaces a virtual audio channel, a RS232 connection and logical I/O:s are set up automatically.

Perfect for radio or alarm systems.

2- or 4-wire audio
Transparent RS232

2 opto input
2 opto output
1 relay driver output
